

# BHUVAN VIRMANI

Footscray, VIC, 3011  
0434096407 | bhuvanvirmani303@gmail.com | [Linkedin](#) | [Github](#)

## PROFESSIONAL PROFILE

Data Analyst | Business Analyst with expertise in **Python, SQL, Tableau, and Power BI**, skilled in transforming complex datasets into actionable business insights. Experienced in **data visualization, statistical analysis, business intelligence, and cloud computing (AWS, Azure)**. Strong problem-solving abilities, with a proven track record of improving processes and optimizing business operations. Passionate about leveraging data-driven solutions to drive business efficiency.

## EDUCATION & QUALIFICATIONS

**Bachelor of Computer Science (Data Science)**  
Swinburne University of Technology | Mar 2022 – Dec 2024

## WORK EXPERIENCE

**ICT Business Analyst - Internship | Builders Academy Australia** Feb 2024 to June 2024

- Analysed **10,000+ student records** using **Excel and VET Trak**, identifying key enrolment trends and optimizing resource allocation.
- Developed **daily and weekly reporting dashboards**, reducing student onboarding time by **15%**.
- Provided **data-driven insights** that improved **strategic planning** for student intake and course offerings.
- Received **commendation from supervisors** for mentoring new interns and fostering a collaborative learning environment.

**IT Support Officer - Contract | University Of Melbourne** Sept 2023 to Nov 2024

- Provided **technical support, troubleshooting, and issue resolution** for students and faculty during **exam periods**, ensuring minimal disruptions.
- Diagnosed and resolved **hardware, software, and network issues**, including **Windows, macOS, and Microsoft 365 applications**.
- Assisted students with **LMS platforms, VPN connectivity, and collaboration tools** like **Teams and Zoom**.
- Managed **help desk tickets** and escalated complex issues following **ITIL best practices**.
- Supported **Active Directory (AD) user management, password resets, and access control**.
- Implemented **proactive troubleshooting measures**, reducing IT support requests by **20%**.

## PROJECTS

**Project Title: Forest Fire Damage Prediction Model**

- Built a predictive model** using **R**, analysing **5 years of weather data** to predict fire spread patterns.
- Improved prediction accuracy by 20%**, aiding government agencies in disaster prevention.
- Utilised libraries like **ggplot2** for data visualisation and analysis, enhancing prediction accuracy.

**Project Title: Electric Mobility Business Analysis with Tableau**

- Conducted a detailed EV market analysis (2019–2023) for SparkeV, **identifying sales trends and high-performing models**.
- Built interactive Tableau dashboards/ PowerBI** and utilized **SQL** to query and process large datasets, to support data-driven strategic decisions, improving product lineup and pricing.
- Provided strategic recommendations that optimized **pricing and product lineup** decisions.

**Project Title: - Interactive Migration Patterns Web-Application**

- Developed a **responsive web app with D3.js**, featuring dynamic visualisations such as bar, line, and pie charts.
- Integrated **real-time data filtering and interactive tooltips** for better user insights.

**Project Title: Airline Dataset Cleaning and Analysis with KNIME**

- Cleaned and standardized **6,000-record airline dataset**, ensuring data integrity for analysis.
- Conducted **trend analysis**, uncovering key insights into **customer behaviour and airline performance**.

#### Project Title: - Data Analysis with Tableau

- **Analysed inventory performance metrics**, including turnover rates and safety stock levels, **using Tableau**.
- Identified inefficiencies in overstock management, particularly for mountain bikes, and proposed JIT inventory solutions.
- **Recommended improvements in demand forecasting** and real-time tracking to optimise operations.

#### Project Title: Email Security Gateway Implementation

- Designed a sophisticated email security gateway to filter malicious content using advanced threat intelligence.
- Enhanced email authentication with **SPF, DKIM, and DMARC protocols**, ensuring robust **protection against phishing, spam, and spoofing**.
- Incorporated encryption and DLP features to safeguard sensitive data, achieving a highly secure and compliant email system.

### KEY SKILLS

- **Programming:** Python, C#, Java, Ruby, PHP
- **Data & Visualization:** SQL, Tableau, Power BI, KNIME, D3.js
- **Cloud & DevOps:** AWS (EC2, Auto Scaling), Azure (DevOps, Pipelines)
- **Security & Networking:** Email Security (SPF, DKIM, DMARC), Active Directory, Windows Server
- **Database & Big Data:** SQL, MS Access, Hadoop, Hive, Pig, Scoop, VETtrek
- **Systems & Tools:** Logisim, ARM Assembly Language
- **Core Competencies:** Critical Thinking, Problem-Solving, Data Management

### CERTIFICATIONS

LinkedIn Learning:

- Excel Essential Training (Microsoft 365) [2023]
- A day in life of a Data Scientist [2023]
